**IPC Systems Receives 2010 *Communications Solutions*
Product of the Year Award**

IPC's Pulse Enterprise Trading Communications Application Recognized for Outstanding Innovation

Jersey City, N.J., – October 29, 2011 – IPC Systems, Inc., a leading provider of trading communications solutions to the world's top financial services firms and global enterprises today announced that TMC, a global, integrated media company, has named Pulse Enterprise as a recipient of a 2010 Communications Solutions Product of the Year Award.

Pulse Enterprise is a revolutionary trading communications application that simplifies communication and collaboration between traders and the middle and back office throughout the trade lifecycle. It gives "off-floor" users access to the enterprise-wide Unigy directory and presence capabilities, helping them locate the parties they need to reach quickly. The application also simplifies deployment and allows for greater security and control over the entire system. Pulse Enterprise provides access to hoot and intercom via the PC, TV audio and speaker channels using the same unified trading communications system and management platform as IPC's IQ/MAX and IQ/MAX Edge turrets.

"We are honoured that TMC has selected Pulse Enterprise as one of the best products of the year," said Mark Miller, vice president of product management, IPC. "Our goal is to help our customers do their jobs more effectively and efficiently and Pulse Enterprise meets their need for more collaboration between traders and their middle and back office trade support teams; research analysts, economists and portfolio analysts."

“IPC was chosen to receive a 2010 Product of the Year Award for creating exceptional advancements in voice and data communications,” said Rich Tehrani, CEO, TMC. “Pulse Enterprise has shown benefits for its customers and provides ROI for the companies that use it. Congratulations to the entire team at IPC. I look forward to more innovative solutions from them in the coming year.”

The Communications Solutions Product of the Year Award recognizes the vision, leadership, and thoroughness that are characteristics of the prestigious award. The most innovative products and services brought to the market from March 2010 through March 2011 were chosen as winners of the Communications Solutions Product of the Year Award. The 2010 Communications Solutions Product of the Year Award winners are published on the [Internet Telephony](#) and [Customer Interaction Solutions](#) Websites.
