## IPC Further Expands in Asia Pacific with New Office in Beijing

*New location is IPC's ninth in Asia Pacific*

**March 14, 2007, Beijing & New York**– IPC Information Systems, a leading provider of mission-critical trading floor communication solutions to global and local enterprises, announced the opening of its second office in Mainland China today. The office, located in the Central Dong Cheng district, is IPC's ninth in Asia Pacific, with offices already established in Tokyo, Hong Kong, Singapore, Sydney, Melbourne, Kuala Lumpur, Jakarta and Shanghai. IPC currently serves more than 500 clients in 15 cities throughout the region including Barclays Capital, Deutsche Bank, JPMorgan Chase and Citigroup.

IPC's core solutions are rooted in the world of Financial Services, where it is recognized as a world leader in communication systems. IPC was the first trading systems provider to offer Voice over Internet Protocol (VoIP), a popular platform in Asia Pacific and increasingly so across the globe.

Steven Phillips, Managing Director, IPC Asia Pacific said, "The rapidly evolving Chinese financial markets and the growth of the domestic banking sector have made Beijing the obvious choice for IPC's latest direct office. Clients in this region are increasingly adopting more advanced solutions, and they are looking to IPC to help them reap the benefits. Globally, IPC links thousands of traders to their counterparties instantly over our managed private IP network infrastructure, in more than 200 cities across six continents. This includes points of presence (POPs) in Beijing and Shanghai."

The Beijing office will be managed by Helena Hu, IPC's Sales Director and Country Manager for China. Ms. Hu has spent 12 years in the Chinese financial markets and was responsible for opening IPC's Shanghai office in 2006.

Ms. Hu says "With the opening of the Beijing office, IPC is now able to offer a seamless service to our customers in China's two main financial centres which will allow IPC to better serve this important market."

### **About IPC**

IPC is a leading provider of mission-critical communications solutions to global enterprises. With more than 30 years of expertise, IPC provides its systems and services to the world's largest financial services firms, as well as to public safety; government; power, energy and utility; and transportation organizations. IPC offers its customers a suite of products and enhanced services that includes advanced Voice over IP technology, and integrated network and management services to over 40 countries. Based in New York, IPC has over 1200 employees throughout the Americas, Europe and the Asia Pacific regions. For more information visit [www.ipc.com](http://www.ipc.com).

*Statements made in this news release that state IPC's or its management's intentions, beliefs, expectations, or predictions for the future constitute "forward looking statements" as defined by federal securities laws, which involve significant risks and uncertainties. Many risks and uncertainties are inherent in the telecommunications equipment industry. Others are more specific to our operations. The occurrence of the events described and the achievement of the expected results depend on many factors, some or all of which are not predictable or within our control. Actual results may differ materially from results discussed in these forward looking statements. Among the factors that could cause actual results, performance or achievement to differ materially from those described or implied in the forward-looking statements, are risks associated with substantial indebtedness, leverage and debt service, risks relating to the performance of our business and future operating results, risks of competition in our existing and future markets, loss or retirement of key executives, risks related to the notes and to high yield securities generally, general business and economic conditions, market acceptance issues, including potential technology changes and the risks inherent in new product and service introductions and the entry into new geographic markets, as well as those risk factors described in our filings with the SEC.*
