IPC Launches Digital Domestic Voice Services in Japan

May 9, 2007, Tokyo, New York - IPC, the leading provider of mission critical communications solutions to global enterprises, today announced service availability of local and domestic trader voice services in Japan. These new services enable Tokyo-based IPC customers to implement resilient digital delivery for trading floor communications. IPC is a leading provider of mission-critical communications solutions to global enterprises, serving financial services institutions in more than 40 countries.

Upon completion of the On-Net digital presence to customer locations in Japan and throughout the region, IPC will be able to offer reduced installation times both domestically and internationally and to introduce advanced Business Continuity Planning/Disaster Recovery options which were previously unavailable.

As part of IPC's continued focus on exceptional service performance all digital services are proactively monitored 24x7x365 by IPC Global Solutions Operations

Centers (GSOC). Additionally, IPC customers can access a secure web-based portal that allows them to view circuit inventory, performance metrics and all IPC On-Net locations to ease the administration associated with circuit management.

“IPC is privileged to have excellent business partners in Tokyo and is continuing to invest in products and services that help enhance our customers’ competitive position in the global financial sector,” said Stephen Phillips, Managing Director of Global Sales. “Our recent launch of digital voice services in Tokyo will streamline the implementation of new domestic and international trader connectivity and will help attract new financial partners to this dynamic market.”

The launch of domestic services in Tokyo is further evidence of IPC’s continued growth in Asia Pacific. In the last year alone, IPC opened its ninth office in the region and now serves more than 500 major clients in 18 cities throughout Asia, including Barclays Capital, Deutsche Bank, JPMorgan Chase, and Citigroup. IPC also now has more Asia-Pacific network locations (POPS, or Points-of-Presence) than any other provider--- 21 in total.

About IPC

IPC is a leading provider of mission-critical communications solutions to global enterprises. With more than 30 years of expertise, IPC provides its systems and services to the world’s largest financial services firms, as well as to public safety; government; power, energy and utility; and transportation organizations. IPC offers its customers a suite of products and enhanced services that includes advanced Voice over IP technology, and integrated network and management services to over 40 countries. Based in New York, IPC has over 1,200 employees throughout the Americas, Europe and the Asia Pacific regions. For more information visit www.ipc.com.

Statements made in this news release that state IPC’s or its management’s intentions, beliefs, expectations, or predictions for the future constitute “forward looking statements” as defined by federal securities laws, which involve significant risks and uncertainties.

Many risks and uncertainties are inherent in the telecommunications equipment industry. Others are more specific to our operations. The occurrence of the events described and the achievement of the expected results depend on many factors, some or all of which are not predictable or within our control. Actual results may differ materially from results discussed in these forward looking statements. Among the factors that could cause actual results, performance or achievement to differ materially from those described or implied in the forward-looking statements, are risks associated with substantial indebtedness, leverage and debt service, risks relating to the performance of our business and future operating results, risks of competition in our existing and future markets, loss or retirement of key executives, risks related to the notes and to high yield securities generally, general business and economic conditions, market acceptance issues, including potential technology changes and the risks inherent in new product and service introductions and the entry into new geographic markets, as well as those risk factors described in our filings with the SEC.
